SUMMARY

Having passion in making mobile and web applications presenting background in UNIX/Linux environment through work experience and undergraduate courses

EDUCATION

University of Illinois at Chicago (UIC) | GPA: 3.92   **Expected May 2018**
B.S. Computer Science   *Chicago, IL*

WORK EXPERIENCE

Software Engineering Intern, Alticast – Seoul, South Korea   **June 2017 – Aug. 2017**
Developed Android TV application for 2017 IBC Conference
- Implemented Google open source project 'androidtv-Leanback' framework
- Connected and verified the device with the server to retrieve the channel and menu lists

Undergraduate Teaching Assistant, University of Illinois at Chicago   **Fall 2016 – Fall 2017**
- Courses covered: CS 141 (Program Design II), CS 211 (Programming Practicum)
- Attending lab sessions and holding office hours to assist student with their projects

Quality Assurance Intern, Edito Co., Ltd. – Seoul, South Korea   **May 2016 – July 2016**
Software Education Platform for elementary school students
- Created test cases and documented testing reports
- Field experience to meet customers and students while setting up the program

PROJECTS   *(more at https://junlee91.github.io/)*

Sodagram   **Dec. 2017 – Present**
Cloning Instagram with Python Django and React/React-Native
- RESTful API design with Django REST Framework
- Facebook authentication and JWT to post, comment, and like photos

Spotify-demo   **Dec. 2017**
Cloning Spotify with Spotify Android SDK
- User authentication to verify and stream the music
- Applied various open source libraries (ScalingLayout, Spotify Web API wrapper, etc.)

U TIME *(Available on Google Play)*   **July 2017 – Sept. 2017**
Time scheduling application for UIC students
- Connects and retrieves the data from MySQL server using PHP
- Collects course information from *my.uic.edu* with Python web scraping framework 'Scrapy'

Netflix App   **Spring 2017**
Netflix Database GUI Application using N-Tier Design
- Data-driven Window application in which users make events to search movie and add ratings

AWARDS

[Hackathons] 3rd coolest prize by Capital One, DemonHacks (36hr) – DePaul University   **Oct. 2017**
- Pic-a-vibe: Web application to search image and offer matching sounds for selected image

SKILLS

Programming Languages	Java, C/C++, Python, JavaScript, HTML/CSS
Databases	MySQL, PostgreSQL, SQLite, MS SQL
Frameworks/Libraries	React, React-Native, Redux, Django
Technologies	Android, AWS, Node.js, GitHub
